

# PETER STANLEY TRAINING

Professional, specialist fire training

## COURSE OUTLINE

### AIM:

The course is aimed at anyone who is intending to design emergency simulations using FireStudio4 Instructor edition.

### OBJECTIVE:

At the end of the course the delegate will be able to:-

1. Create a simple story board
2. Take and edit background photographs Adobe Photoshop elements
3. Take and edit clip art photographs using Adobe Photoshop elements
4. Manage and customize the Fire Studio 4 data files
5. Identify and become familiar with each of the key functions of the Fire Studio4 main control panel
6. Switch between author and present mode and single and multiple views
7. Select, cut and paste a window
8. Step forward, move out of sequence, name, copy, paste and jump slides
9. Use the media panel to select different layers to make up windows within a slide
10. Modify layers using the global and layer properties panel
11. Import custom media such as clip art and sound files
12. Edit and save a simulation
13. Switch data files between different desktops and laptops
14. Present a simulation

## DESCRIPTION

- The course will consist of two days teaching held at your training centre or a local off site venue
- Learners will undergo taught input from a qualified tutor, practical work using laptops and desktops , undertake a practical photography session and present a finished simulation
- An online community of practice with discussion forum and chat room will be available to support learners after the course ends

## FIRE STUDIO 4 (BASIC)

### DURATION:

2 days (0900-1700)

### WHO SHOULD ATTEND?

Anyone who intends to work with FireStudio4 to create simulations

### MAX STUDENTS PER COURSE:

4

### NATIONAL STANDARDS:

No cross mapping

### COST PER DELEGATE:

Price on application

### BOOKING INFORMATION:
