

## COURSE OUTLINE

### AIM:

The course is aimed at fire service principle and area managers who will command large scale operational incidents involving more than ten appliances.

### OBJECTIVE:

At the end of the course the delegate will be able to:-

1. Collect information through observation and consultation with the L3 incident commander, draw conclusions and agree further action with incident commander to progress the resolution of the incident
2. Identify the strategic priorities of the incident and generate a plan to resolve them
3. Remain flexible and generate strategic solutions as the incident progresses
4. Conduct inter-agency briefings with other services to identify all relevant issues and generate combined solutions, including deployment of joint resources
5. Provide support and direction to tactical commander and support officers  
Ensure that the resilience of the service is taken into account within the large scale tactical deployment
6. Conduct a media briefing and local authority member briefings
7. Conduct briefings with government ministers and representatives where appropriate
8. Institute a recovery plan for the conclusion of the incident

### DESCRIPTION:

- Delegates will undertake an initial assessment, taught input from a qualified tutor, case studies, practical scenario simulation and a final written assessment
- Delegates will produce a portfolio of video and hard copy evidence of competence
- Practical scenario assessment can be conducted using your in house simulator (Vector, Minerva).
- Digital Combustion or similar software will be used if you wish to tailor the scenarios to specific risks in your service
- Other agencies representatives can be integrated into the practical simulations or role players will be provided
