AIM

To develop and accredit fire officers to undertake incident command management assessments in the workplace as part of a performance management system.

OBJECTIVES

At the end of the course the learner will be able to:-

- Demonstrate a comprehensive understanding of the Fire Service Manual Incident Command 3rd edition.
- Conduct assessments of individual fire officers against the performance standards prescribed within National Occupational Standard (NOS) WM7 or EFSM2
- Produce a report on an individual's performance in incident command role which will include a judgement of competence against each of the performance criteria of the appropriate NOS and a subjective assessment.
- Conduct an in depth debrief of the individual under assessment, using video of the performance to illustrate learning points.

DESCRIPTION

Learners will :-

- Undertake three online modules, taught input from a qualified tutor, case studies and be provided with practical incident simulation assessment opportunities.
- Produce a portfolio of hard copy evidence.
- Scenario's can be tailored to your existing risks if using Fire Studio 4.
- Have access to an online Community of Practice after their course to support continuing professional development free for one year.

The practical simulation will be conducted using your in house simulator (Vector, Minerva) or Fire Studio 4 as a standard.
